

“The kitchen is the engine of the home”

— MICHAEL ROGERS (MANAGING DIRECTOR)

CONTEMPORARY KITCHEN

Incorporating hard angles, open spaces, and brushed metal accents, contemporary kitchen designs seek to create a warm and welcoming environment that will never go out of style. Subtlety is the key to creating a clean but not clinical feel that can be completely changed with the addition of something as minimal as a colourful vase, or coloured glass splashbacks.

A contemporary kitchen design is the perfect choice for anyone who seeks to use their kitchen for more than just cooking. The no nonsense and clean approach lends itself perfectly to large or small spaces, and the lack of clutter in the design is an excellent attribute for those looking to create something striking and timeless.

Design Interiors will help you create the perfect bespoke kitchen to bring your design dreams to life.

Above: A robust solid timber breakfast bar sits on the functional handleless island, showing that contrasting materials blend together to create a stylish design.

Right: A variety of internal organisation & storage solutions are available in a various styles & finishes.

Above: Organisation & draw management is key in a compact kitchen & gives the design a clean, uncluttered look.

Left: Innovative shelving solutions are an attractive alternative to wall units.

TRADITIONAL KITCHEN

Although it has certainly evolved over the years, traditional design has remained a consistently popular style among those seeking a new kitchen, and for good reason. A traditional kitchen is reflective of the outside world, and the never-ending beauty of nature. Natural shapes as well as exposed wood grains are the key features that often distinguish traditional kitchen design, whether they are used as a main feature or as the smallest accent.

Traditional design is the perfect choice if you're dreaming of giving your kitchen that homely feeling. The colour palettes combined with the natural colour of wood give an immediate feeling of warmth, and can add much needed character to your new bespoke kitchen.

Our experienced design team will make your traditional design dreams a warm reality.

throughout each individual element of the
construction.*

STORAGE

Everyone needs more storage in their kitchen. It doesn't matter how much space you already have, you'll always need more. Design Interiors will create clever and bespoke storage options to help de-clutter and re-organise your kitchen from the top down.

BEDROOM

Bedroom design has to walk a very fine line, and is often the aspect that you'll get stuck on when it's time for a change. No matter who you are, your bedroom is a very personal space, and as such it should reflect your character. Your bedroom has to strike a delicate balance between style and function, as well as serving to relax you. In this regard, it also has to be calming, but not so calming as to appear soulless.

The specialist team at Design Interiors can help bring your ideas to life, and our vast range of options will ensure that you walk away with a truly unique result.

wardrobe with a bespoke
internal layout available in a
wide range of contemporary
finishes.*

LIVING

Your living room is your area to unwind, so it's important to create a design that you love. It must be adaptable for any occasion, and it must incorporate the styles that suit you.

The living area is also a place of variety. Unlike a kitchen or bedroom, the function of a living area changes from person to person. Everyone likes to unwind in different ways, so don't let pre-conceived notions of what a living area should be cloud your design preferences.

Design Interiors will create a room that is both functional and uniquely catered to you and your family.

Right: Examples of bespoke freestanding & built in living room furniture.

“Your living area
is your place to
rest and relax.
It should be
luxurious and
mould perfectly
with your own
personal tastes.”

& storage solution.*

COMMERCIAL DEVELOPMENT

Our aspiration and forward-thinking approach to design doesn't stop in the home. Design Interiors also takes on large-scale commercial projects, and we believe in delivering that personal touch, no matter how large your project is.

Our previous projects have included a wide range of commercial property, including redevelopments and new-builds, all of which needed that special something to make them stand out in a crowded marketplace.

Design Interiors will add the unique touches of home to your commercial property, leaving it head and shoulders above the rest.

ABOUT

Guiding our customers through the process from design and installation to completion has always been my driving force. I strive to ensure that once the work with our client is complete, not only are they satisfied with our work, but they also understand the functionality of their new design. I want people to think of Design Interiors as a safe pair of hands that are here to guide them through the process of making their dreams a reality.
